

Initialise const(state=0)

moving:

action = 2

move to Location (2);

Listeners

TTS

Complete
Cancel

++ Notify()
increment 0 notify()

Location

Complete
Stuck

++ notify()
retry notify()

States Switch

case		V		Listeners	
		String[]	TTS ...	TTS	
2	Talking				
3	Moving	String[]	Locations	TTS	Location User Presence
4	Waiting (Sanitizer / Patrol timing)	int time	String[] TTS	TTS	
5	Following	—	—	Detection	TTS
6	Listening	NLP, String[]	TTS	TTS	
7	Returning	String[] TTS		TTS	
0	Paused	—			
1	Exit	—			

run

```
(while state != 1) {
    action += increment
    states (increment, state)
```

Need a fn onTTS Wake() that changes things before notify()
on Detection Wake()
on X Wake()
