Hi Jess,

I can confirm that all the engravings on the acrylic sheet will only be in white, so the logo you supplied is suitable.

Thanks!

Hi Russell,

That looks good, thank you. Approved. Just double checking you don't need it colour like the other logo because they'll both be engraved as white? Is that correct? Just want to make sure I haven't misunderstood your email because I can supply you a coloured version if you need it.

Thank you,

Jess

Hi Russell and Jess,

Here is the identical image with one of the provided logos used.  
Thanks,  
Brandon

From Jess  
-----

Hi Russell,

Our designer has reviewed the logos.

Please use one of the attached logos instead as it has squiggly lines in the book of crest instead of words, which might translate better as you are getting it engraved.

If you could please send another proof through, that would be great.

Thank you,

Jess

Hi, here are the images that should be used for approval. The PMMA engraved image below is the best I could do for now, I am limited on software.

Please also provide the text description to the team which authorises logo usage.

This is the best rendition of our intentions as I don't have access to the vector software used for the final design yet. The grey area is to be clear acrylic glass.

The Flinders logo, “The Hospital Research Group Foundation” logo, and the black text will be laser engraved onto the acrylic. This will turn the images and text white.

The size and font of the black text will be slightly different to the image.

The Flinders University logo will be used on this UI screen on the Temi robot. The size and font of the text may change.

**Subject:** Temi Updates

Hi all,

Just some quick updates.

First of all, should I continue to ping Karl in these emails? I think he gets enough emails already...

1. I was feeling unwell this morning for an unknown reason (nausea, headache) so I couldn't make it in until about noon. It seems to have passed and no COVID symptoms were observed, and the result is just that I am a bit slow today.
2. I've fixed the fatal bug from last week.
3. The 3D prints and laser cuts are in progress.
  - a. We are waiting on Damian to receive more support material for the print.
  - b. We are waiting on delivery of M8 nuts.
  - c. We are waiting on delivery of PMMA sheets.
  - d. We have a large excess of M8 bolts.
4. I have started the final documentation process.
5. A bit more testing is needed around different environments. I might test it in the open space on Lvl4.
6. This week I need to:
  - a. Clean up the displayed text.
  - b. Test the robot throughout settings changes (this is one of the reasons the horrible bug appeared last time).
  - c. Document the installation process from Factory Reset.

- d. Investigate using the Temi App Store to deploy and update the software, rather than a manual upload requiring some extra software.
- 7. **Things I need your help/advice with:**
  - a. Are there any licences/liability declarations/warranties/other legal doc that we need to include with the package? i.e. This is what the software does and does not do. This is how you shouldn't use the robot, otherwise we aren't liable for any damages. This is what features you should contact the Temi team for, these are the things you should contact me for. Etc.
  - b. I recall that the Flinders logo required approval before use, and I am assuming Russell has to sign off on it. The logo will be used on the UI of the robot, and engraved on the PMMA sheet. I have provided images below and hopefully that will be sufficient to get approval.
    - i. Note, the text sizes and fonts may need to change.
    - ii. <https://staff.flinders.edu.au/workplace-support/topic/brand><https://staff.flinders.edu.au/workplace-support/topic/brand>
    - iii. <https://webapps.flinders.edu.au/flinpress/logo.html>

After this, fingers crossed there are no more game-breaking bugs and I think the software is finished.

Thanks,  
Brandon
